

## Election Promises

### What would you deliver?

Imagine you are running as a **candidate** at the next state election...

Consider the **constituents** in your **electorate** that you are hoping to represent. Describe the different groups or communities in your electorate?

What **election** promises would you deliver for your possible future constituents?

Several people in your electorate believe that schools need more education resources. How would you deliver for these constituents?

Considering that you have lots of different community groups in your electorate, explain what you would need to consider before making decisions about **resource allocation**.

Are your election promises useful for all of your constituents? Are there issues that affect other community groups that need to be addressed in your electorate?
